### **Important Performance and Expense Information**

*All performance information reflects past performance, is presented on a total return basis, and reflects the reinvestment of distributions. Past performance is no guarantee of future results. Current performance may be higher or lower than performance quoted. Returns as of the most recent month-end may be obtained at [www.roycefunds.com](http://www.roycefunds.com). The Fund invests primarily in securities of small-cap and micro-cap companies, which may involve considerably more risk than investing in larger-cap companies. The Fund's broadly diversified portfolio does not ensure a profit or guarantee against loss. From time to time, the Fund may invest a significant portion of its assets in securities of companies headquartered in foreign countries, which may be subject to different risks than investments in securities of U.S. companies, including adverse political, economic, currency and other risks not encountered in U.S. investments.*

### **PORTFOLIO DIAGNOSTICS**

Average Market Cap <sup>1</sup>	\$1789.9M
---------------------------------	-----------

Weighted Average P/E <sup>2</sup>	23.9x
Weighted Average P/B <sup>2</sup>	2.9x
Net Assets	\$130.7M
Net Leverage	3.9%

<sup>2</sup>**Geometric Average:** This weighted calculation uses each portfolio holding's market cap in a way designed to not skew the effect of very large or small holdings; instead, it aims to better identify the portfolio's center, which Royce believes offers a more accurate measure of average market cap than a simple mean or median.

<sup>2</sup>**Harmonic Average:** This weighted calculation evaluates a portfolio as if it were a single stock and measures it overall. It compares the total market value of the portfolio to the portfolio's share in the earnings of its underlying stocks.

The **Price-Earnings**, or P/E, ratio is calculated by dividing a company's share price by its trailing 12-month earnings-per-share (EPS). The Fund's P/E ratio calculation excludes companies with zero or negative earnings (9% of portfolio holdings as of 10/31/19). The Price-to-Book, or P/B, Ratio is calculated by dividing a company's share price by its book value per share.

The **Price-to-Book**, or P/B, Ratio is calculated by dividing a company's share price by its book value per share.

Net leverage is the percentage, in excess of 100 %, of the total value of equity type investments, divided by net assets.
