Current performance may be higher or lower than performance quoted. Returns as of the most recent month-end may be obtained at [www.royceinvest.com](http://www.royceinvest.com). From time to time, the Fund may invest a significant portion of its net assets in foreign securities, which may involve political, economic, currency and other risks not encountered in U.S. investments.*

<sup>1</sup>**Geometric Average:** This weighted calculation uses each portfolio holding's market cap in a way designed to not skew the effect of very large or small holdings; instead, it aims to better identify the portfolio's center, which Royce believes offers a more accurate measure of average market cap than a simple mean or median.

<sup>2</sup>**Harmonic Average:** This weighted calculation evaluates a portfolio as if it were a single stock and measures it overall. It compares the total market value of the portfolio to the portfolio's share in the earnings of its underlying stocks.

The **Price-Earnings**, or P/E, ratio is calculated by dividing a company's share price by its trailing 12-month earnings-per-share (EPS). The Fund's P/E ratio calculation excludes companies with zero or negative earnings (11% of portfolio holdings as of 02/28/26). The Price-to-Book, or P/B, Ratio is calculated by dividing a company's share price by its book value per share.

The **Price-to-Book**, or P/B, Ratio is calculated by dividing a company's share price by its book value per share.
